# CONCEPT AND STORY

## Since 2012

We began in the Jordanian market under the name (Online Ideal Techniques) digitally, by offering various digital services and solutions. The trend towards digital transformation was common, which allowed us to expand our E-Commerce and digital marketing services.

At the beginning of 2020, our work shifted to become a "Question Point" in order to build a new concept with no limits. This involved working on E-Learning platforms, expanding E-Commerce services, and digital marketing services.

# TIME LINEUP

## Operation Management

Every project is meticulously divided into distinct stages and strategies with the goal of fostering growth, optimizing outcomes, and fostering the notion of value addition.

We rely on intelligent programs in managing plan execution, content development, and communication strategy for each client.
